Considering your beauty

A new generation of Cross-linked Hyaluronic Acid fillers DERMARCANE is aseptic products, highly tolerated, viscoelastic filler made with cross-linked hyaluronic acid, ideal for subcutaneous applications.

Best choice of total beauty care company is You and Me Korea Co., Ltd.

What is DERMARCANE dermal filler ?

A new generation of Cross-linked Hyaluronic Acid fillers DERMARCANE is aseptic products, highly tolerated, viscoelastic filler made with cross-linked hyaluronic acid, ideal for subcutaneous applications.

Monophasic Cross-linked Hyaluronic Acid fillers DERMARCANE is safely injectable, safty, biodegradable medical device made with hyaluronic acid created from non-animal sourced bacterial bio-fermentation. The extremely low concentration of impurity and the bacterial endotoxin rate < 0.05 EU/ml minimise any hypersensitivity reaction.

It is a colourless monophasic gel contained in a disposable prefilled, ergonomic syringe with a Luer Lock adapter that makes it easy to handle.

Minimise any hypersensitivity reaction DERMARCANE is manufactured under the strict controls of the certificates ISO 13485 and Ministry of Food and Drug Satety by Korea.

DERMARCANE has an immediate lifting effect, thanks to it's intrinsic viscoelastic and hydrophilic properties. The treatment result is very natural and immediately visible. 24mg/ml concentration Hyaluronic Acid allows reducing any type of deep wrinkles, reshaping the face contour and lips, and hydrating the skin in depth.

Frequently Asked Questions

[Q] How often will I need a treatment?

[A] People tend to have top-up treatments once they notice the benefits beginning to wear off, usually anytime between 6 and 24 months.

[Q] Who is suitable for Hyaluronic Acid Dermal Fillers?

[A] Almost everyone, providing they're not pregnant or breastfeeding.

[Q] Are there any long-term problems?

[A] No. One of the real beauties of Hyaluronic Acid Dermal Fillers is there aren't any long-term problems because it's a natural treatment that's safely broken down by the body over time.

[Q] Are there any side effects?

[A] You might experience some minor swelling or redness which should last no more than a day or two, or very occasionally up to one week. A tiny proportion of people experience some bruising around the injection site.

[Q] Are the injections painful?

[A] The injections aren't painful, because our Hyaluronic Acid Dermal Fillers include anaesthetic called "Lidocaine".
